DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The claims are patentable over the prior art of record, because the teachings of the references taken as a whole, do not show or render obvious the combination set forth in claim 1 "two deflection rollers mounted on the locking unit and being movable therewith", claim 17 "a cable attached to an upper end of at least one of the guides and to a lower end of at least one guide, the opening element acting through said cable on the locking unit for removing the active connection with the locking element", claim 18 "at least two deflection rollers provided on the locking unit over which a cable being guided which is attached to an upper end of the frame and connected with an opening element arranged on the floor which then effects a movement of the cable when the opening element is actuated", claim 22 and 27 "the cable being attached to a building".
